

DiaCard S
Dry Bicarbonate Bags

- For use on Fresenius 4008 and 5008 devices

Our bicarbonate bags facilitate the most physiological and effective bicarbonate dialysis techniques.

Manufactured under the strictest safety standards, our range of bicarbonate bags is an essential component of any dialysis fluid delivery system.

DiaCard Bags (650g & 900g)
Key Specs

- Hermetically sealed package ready for the online preparation of liquid bicarbonate solution
- Unique connector design allows for a perfect fit onto dialysis machines
- Two filters (0.2 µm)—one on the inlet and another on the outlet
- End ports open—no sealed layer to perforate, reducing risk of machine damage
- Sodium bicarbonate powder (Ph.Eur.)
- Environmentally friendly material (polypropylene)
- Suitable up to 8 hours of treatment (900g)
- Unique universal container design offering 60% stock reduction compared to canisters
